

Possibilities, Priorities, and
Options for the
Development of Biofuels
Trade and Carbon Policies
Throughout the Americas

Convened by The Heinz Center

Biofuel Production

It should be sustainable, right?

Where We Agree

Production of Biofuels Should be Sustainable

- What are acceptable ranges for environmental, social, and economic factors?
- What time horizon should be used?
- Should carbon be part of the equation?

Speakers

- **Dr. Marcia Patton-Mallory**, Biomass and Energy Coordinator, Forest Service, USDA
- **David P. Swanson**, Partner at Dorsey & Whitney LLP, and Chair of the Agribusiness, Cooperative and Rural Electric Practice Group
- **Dr. William A. Ward**, Director of the Center for International Trade and Professor of Applied Economics and Statistics at Clemson University
- **Craig Cox**, Executive Director of the Soil and Water Conservation Society
- **Dr. Thomas H. DeLuca**, Senior Forest Ecologist, The Wilderness Society
